Power Climber Wind's IBEX™ Climb Assist in 66 Wyoming Wind Turbines

SEATTLE/BRUSSELS — Power Climber Wind, a division of SafeWorks, LLC, was recently selected as the preferred supplier of IBEX™ Climb Assists for 66 new wind turbines in Glenrock, Wyoming, USA.

Sixty-six IBEX™ 1000 Climb Assists will be installed in the GE 1.5 MW wind turbines being constructed at the Top of the World project located near Casper, Wyoming for one of the largest wind power owners and operators.

The patented IBEX™ Climb Assist puts the complete control over the climbing effort and experience into the hands of the climber, delivering personalized performance, increased safety, and better productivity in any tower.

The system allows user-adjustable support settings at 50, 75, 100, and 125 lbs (23, 34, 45, and 57 kgs), and provides constant load support in both the up and down directions, regardless of climbing speed. The IBEX™ system can be installed in any new or existing wind turbine tower with straight-run ladders, whether tubular steel or lattice construction.

"We are proud to deliver access solutions to one of the premier wind operators in North America," said Mike Russell - North American Sales Manager, Power Climber Wind. "Our IBEX 1000™ Climb Assist systems will improve the safety, comfort and productivity of the wind technicians, and ultimately deliver superior turbine performance at the Top of the World site. Our innovative, top of the line climb assist systems combine with our unmatched customer service to distinguish us from the competition."
