## **Power Climber Wind Announces Partner Deal for IBEX™ Climb Assist**

BRUSSELS/SEATTLE—Power Climber Wind, a division of SafeWorks, LLC today announces that Ynfiniti Engineering Services has made IBEX™ its sole climb assist offering.

The patented IBEX™ Ladder Climb Assist puts the complete control over the climbing effort and experience into the hands of the climber, delivering personalized performance and increased safety, and better productivity in any tower. Designed to address the growing focus on employee health and safety among leading wind turbine owners, the IBEX™ system can be installed in any wind turbine tower with straight-run ladders, whether tubular steel or lattice construction. Over 750 IBEX™ units have been installed since its market release earlier this year.

Madrid-based, Ynfiniti Engineering Services S.L. (YES) provides equipment and services for the renewable energy sector, specialized in wind and solar power. It specializes in providing assembly, maintenance and operations services for wind farms throughout southern Europe.

"Customer feedback on IBEX™ is incredibly positive," said Greg Crew - Global Wind Product Manager, Power Climber Wind. "Climbers tell us the assistance settings conveniently adjustable on the EasyClimb Controller that the user wears, combined with the smooth start and stop motion offers superior performance over competing products in the market."

"IBEX™ targets the 50,000-plus operating turbines in Europe and North America that lack a powered access solution. With the capabilities to install, maintain and train wind farm operators, YES is a trusted local partner to deliver valuable support to a climb assist solution no competitor can match," comments Ignacio Esteve, General Manager, Ynfiniti Engineering Services S.L (YES).

Experience the IBEX™ Ladder Climb Assist system by contacting our sales professionals at 1.323.451.0500 in Europe & Asia and 1.877.729.4631 in North America.
