Power Climber Wind Launches IBEX[®] 1000P at Windpower 2011

SEATTLE/BRUSSELS — Power Climber Wind, a division of SafeWorks, LLC, today introduced the new IBEX[®] 1000P, the next series of its IBEX[®] climb assist system featuring the most durable, lightweight and portable control box in the market. A fully operational IBEX[®] 1000P demo on an 18-foot ladder at the Windpower exhibition generated much attraction at Power Climber Wind's booth (#4049).

The new 1000P offers the same intelligent performance of the IBEX[®] climb assist and sets the standard for portability and affordability. The 1000P's portable control box, weighing only 8.5 lbs (4 kgs) is easy to set up – just click, plug and climb. The robust design is thoroughly life-cycle tested and approved by wind turbine technicians.

The 1000P's EasyClimb Controller allows each user to customize assistance from 50 to 125 lbs (25 to 55 kgs), providing constant load support regardless of climbing speed and offers true down-climb assistance. The system is designed to be installed in any wind turbine tower and significantly improves employee health and safety, as well as productivity.

“With more than 5,000 systems sold worldwide and rapidly growing, the IBEX[®] climb assist earned market leadership with an innovative solution to the climber's desire to control his work environment. Now this latest innovation defines an entirely new set of expectations,” said Gregory Crew, Global Wind Product Manager. “Leveraging on the same intelligent technology of the IBEX[®] 1000, the new 1000P delivers those benefits and now includes the flexibility of a truly portable, robust control box to keep the technician climbing safely and confidently.”

Take an opportunity to see the IBEX[®] 1000P climb assist system at the Windpower show in Anaheim - booth 4049
