Power Climber Wind Installs IBEX[®] at Challicum Hills Farm in Australia

SEATTLE/BRUSSELS — Power Climber Wind, a division of SafeWorks, LLC, has completed installation of the IBEX[®] 1000 climb assist systems in 21 turbines at Challicum Hills wind plant located near Victoria, Australia.

The Challicum Hills' project generates 53 MW of electricity making it enough renewable clean electricity to power 23,000 homes in the area, eliminating 141,000 tons of greenhouse gas each year. The market leading IBEX[®] climb assist systems have also been installed in multiple locations in Australia, generating over 350 MW of electricity.

The patented, innovative IBEX[®] climb assist is designed to retrofit and sets the standard for performance, safety, and ease of installation in any new or existing WTG. It puts complete control over the climbing effort and experience into the hands of the climber, delivering personalized performance, increased safety, and better productivity in any tower.

This intelligent system allows user-adjustable support settings at 50, 75, 100, and 125 lbs (23, 34, 45, and 57 kgs), and provides constant load support in both the up and down directions, regardless of climbing speed. It can be installed in any new or existing wind tower with straight-run ladders, whether tubular steel or lattice construction.

“Global interest in our products and service offering shows how our innovative solutions make work at height more productive.” said Ruben Bake, Vice President and General Manager. “IBEX[®] continues to be the choice of climb assist. Our Australian customers report that IBEX[®] improves technicians' health, safety and productivity significantly.”

To experience the IBEX[®] climb assist system, contact our sales professionals at +61(0)4 0615 0619 or +1.206.394.5306 for the Americas or email sales@powerclimberwind.com.

About Power Climber Wind

Power Climber Wind helps major wind turbine OEMs, owners and service providers manage their operation and maintenance costs by providing the most reliable access equipment and expertise to improve employee safety, productivity and retention. The world leader in suspended access with more than 60 years experience putting people to work at elevation with motorized solutions, Power Climber Wind provides turbine service lifts, IBEX[®] climb assist, tower access platforms, blade access solutions, safety equipment and training globally. Our commitment to performing productively at elevation drives simple, smart product and hands-on training solutions to drive lower total cost of ownership and make our customers' work a reliable, confident

experience. For further information contact Power Climber Wind at +1-206-394-5306 or visit www.powerclimberwind.com
